

# Business Continuity Management System

## ISO 22301:2012

ISO 22301: 2012 Business Continuity Management System specifies the requirements for organizations to develop a documented management system to create plans necessary to ensure business continuity, prepare applications, businesses, monitor, review, maintain and reduce risks, to save from destructive events.

The conditions specified in the ISO 22301: 2012 Business Continuity Management System standard are generally applicable to organizations in different sectors, in all organizations independent of the sector, number of employees, to the whole or part of the organization. The scope of application of these terms depends on the organization's working environment and complexity. It is an advanced best practice of the BS 25999 Business Continuity Standard, as

ISO 22301 defines the key points in Business Continuity Management (ISY) and prepares to guide your business on the basics of Business Continuity Management. This standard not only ensures that your business is fully ready for your stakeholders, but also provides you with certainty that you can meet expectations both internally and externally.

According to the results of the CMI annual assessment survey, 81% of executives who have implemented business continuity requirements in their businesses over the past 12 months said that problems have been effectively reduced. In summary, Business Continuity works.

an ISO standard.

Our company conducts ISO 22301 Business Continuity Management System audit and certification within the scope of information technologies and business continuity studies.

**ISO 22301 defines the following requirements:**

- Identify the important factors that

affect your business.

- Understand your business needs and goals.

- Install, implement, and protect your Business Continuity Management System.

- Measure your business's entire capacity for unexpected events.

- Ensure consistency with the Business Continuity Management Policy.

If unexpected business interruptions are not for your business, implementing ISO 22301 will be the best option for you. The standard has been specially designed to ensure the continuity of your business functions even in the most unexpected situations.

**ISO 22301 Business Continuity Management System Current Situation Analysis (GAP Analysis):**

The effectiveness and integrity of management systems are compromised due to reasons such as relocation, personnel change, after the important revisions in the system during the establishment of the business continuity management system.

However, even in organizations that do not reference ISO 22301 standards, a management system has been developed and documented over time. Sometimes existing applications also meet the requirements of ISO 22301.

Organizations in this situation can easily identify their deficiencies and comply with ISO 22301 standards by determining to what extent their current situation meets the standard requirements.

Within the scope of this service, an examination is carried out in your organization with reference to ISO 22301 standards, and the points that meet / do not meet the standard requirements and the actions to be taken to meet these conditions are reported to your organization.

**Who does it concern?**  
ISO 22301 is suitable for all small and large organizations from every industry. It is especially necessary for organizations that operate in high-risk environments such as finance, telecommunications, transportation, and the public sector, and maintaining activities is vital for the organization itself, its customers and shareholders.

As BvA Belgelendirme ve Dış Tic. Ltd. Şti. we provide certification of ISO 22301 over Transparent Neutral Veritas with IAS and UAF accreditation.
